

Real farmers. Real results.

WOODSIDE PARK BERRY, NEW SOUTH WALES
A TESTIMONIAL BY **ROBERT AND SUSAN MCINTOSH**

www.performanceprobiotics.com | Phone 1800 118 872

Performance Probiotics products used by Woodside Park.

OPERATIONAL AND PRODUCTION FACTS
 MCINTOSH FARMING PARTNERSHIP
 Milking herd of 150 cows (Registered Holsteins)

PASTURE BASED GRAZING
 Ryegrass and clover in winter.
 Kikuyu and clover in summer with some Lucerne.

THREE GRAIN MIXES TO SUPPLEMENT THE PASTURES
 Dairy ration , Springer ration and Calf ration.

All rations based on grain , dried distillers grain, macro-minerals and Performance Probiotics products for micro-minerals.

What Performance products are you using and how are you using these products in your system?

Healthy Herd – Dairy ration
Healthy Calf Plus – Calf ration
Fireup – Springer ration
Microbial Paste – Initial calf treatment/strategic sickness and stress conditions/rumen disorders/show cattle stress and feed changes.

Why did you choose Performance in the 1st place?

Our first experience was with show cattle then further information via dairy magazines.

What are the things you like most about Performance now that you have been using our product/s for a little while? What does it help you achieve?

We have been using Performance Probiotics for over 10 years now in a range of circumstances, feed variations and animal health issues. We could not afford to be without it now we know what the various Performance Probiotics products can do for us with feed conversion and consistent herd health across the ages.

‘We could not afford to be without it now we know what the various Performance Probiotics products can do for us with feed conversion and consistent herd health across the ages’

What would you say to a friend who was thinking of investing in Performance - but wasn't sure?

It's natural. It is logical that it works the way it does. Our experience tells me to keep on using the comprehensive range of products to suit all our feed and herd health requirements.

Has it saved you time/money/effort? How?

Most definitely! The principle I like the most with Performance Products is that it is preventative strategy rather than reactive. The range of products give us choice to suit our budgets and all products are readily available through local suppliers and Vets.

How easy is Performance to use in your system?

Pellets, powdered products or paste make for safe and user-friendly handling. The packaging of the products in their various forms is a real strong point for convenience and accuracy.

What is the 'major benefit' you see in using Performance?

1. Improved feed conversion in all seasons and feed variations.
2. Transition from pre-calving to full production.
3. Stress management in environment and feed extremes.

THANKS TO ROBERT AND SUSAN MCINTOSH OF WOODSIDE PARK FOR THEIR ONGOING SUPPORT OF PERFORMANCE PROBIOTICS.
